

KZ1100 **SHAFT DRIVE**

What's the best touring bike money can buy? Listen to what the experts at RIDER MAGAZINE said after their 8,000-mile KZ1100 Tour Test:

"The first impression of the KZ1100 is one of smoothness. The bike is not just smooth for a Kawasaki, it's smooth in comparison with any of the currently available models.

"Relaxed, vibrationless touring [is] possible with this engine at any speed from 35 to over 80 mph in fifth gear.

"The suspension combines air adjustability front and rear with the adjustable-damping rear shocks to produce one of the best (maybe the very best) touring suspensions currently available.

"With its lighter weight, great suspension, smooth and very potent engine, shaft drive, cast alloy wheels, great brakes and easy handling, it's just as much at home running around the city as rolling two-up and heavily loaded from sea to shining sea."

The Kawasaki KZ1100. Running light or equipped with optional custom-designed accessories, it's the expert choice.
